Education

JSPM Bhivrabai Sawant Institute of Technology and Research

Pune

Bachelor of Engineering (B.E.) in Information Technology

Aug 2022 – Present

- **Core Coursework:** Object-Oriented Programming (OOP), Computer Network Security (CNS), Data Structures & Algorithms (DSA), Operating Systems (OS), Database Management Systems (DBMS), Software Engineering (SE), Web Tech, IoT.

Professional Experience

Codec Technologies Pvt. Ltd.

Pune (Remote)

Full Stack Developer Intern

Feb 2026 – Mar 2026

- Developed a comprehensive portfolio website from scratch, achieving a 100% responsive layout across mobile and desktop environments.
- Engineered robust backend APIs utilizing Node.js and Express, securely handling client requests with sub-200ms response times.
- Integrated a Nodemailer API for automated email forwarding, processing user inquiries with zero fail rate.

Key Projects

Auction Engine – Real-Time Bidding Platform | MERN Stack, WebSockets

- Engineered a real-time auction marketplace utilizing the MERN stack (MongoDB, Express, React, Node.js) with zero-latency bid processing via WebSockets.
- Implemented secure user authentication and a tamper-proof transaction ledger, ensuring high data integrity for concurrent auction participants.
- Developed automated timer synchronization logic on the backend to prevent race conditions and guarantee accurate, synchronized auction closures across all active clients.

HoneyBot – Threat Intelligence Honeytrap | Cloud Infrastructure, Node.js

- Deployed a decoupled, cloud-based threat intelligence system utilizing a decoy SSH server to safely intercept, log, and analyze automated cyberattacks.
- Built a real-time visualization dashboard to capture malicious credentials and map attacker IP origins on a global map with sub-second latency.

TalentMatrix AI – Resume Analyzer | React, Node.js, Google Gemini API

- Built an AI-powered application leveraging the Google Gemini API to parse complex PDF resumes and extract structured data in under 3 seconds.
- Developed custom prompt engineering logic to instantly generate dynamic skill-gap analyses and personalized 3-month career roadmaps with 95%+ data accuracy.

CyberDash – Cybersecurity Analytics Dashboard | React, Node.js, WebSockets

- Architected a comprehensive cybersecurity dashboard utilizing React and Node.js to aggregate and visualize network traffic data and threat intelligence feeds.
- Integrated real-time alerting mechanisms using WebSockets, reducing threat response time by delivering instant notifications for anomalous network behavior.
- Designed an intuitive, data-dense UI with responsive charting libraries to display live security metrics, ensuring seamless monitoring across desktop and mobile devices.

Certifications & Virtual Experience

Oracle Cloud Infrastructure Generative AI Certified Foundations Associate – Oracle (2025)

Oracle Cloud Infrastructure Foundations Associate – Oracle

Data Visualization Virtual Experience – Forage (Accenture)

Cybersecurity Analyst Job Simulation – Forage (Mastercard)

Technical Skills

Programming Languages: JavaScript (ES6+), C/C++, Python, HTML5, CSS3

Frontend Technologies: React.js, Tailwind CSS, Responsive Design

Backend & Databases: Node.js, Express.js, MongoDB, WebSockets

Tools & Platforms: Git, GitHub, Oracle Cloud, Postman, Vercel

Core Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming

Specialized Domains: Generative AI (Google Gemini API), Threat Intelligence, Data Visualization
