Summary

Final-year Information Technology student and MERN Stack Developer with hands-on experience building full-stack web applications and AI-integrated tools. Comfortable working across the stack – from designing REST APIs and MongoDB schemas to building responsive React interfaces – and eager to apply this foundation to real-world engineering problems. Actively exploring Generative AI integration (Google Gemini API) and cloud fundamentals, with a growing interest in threat intelligence and secure systems design.

Professional Experience

Codec Technologies Pvt. Ltd.

Full Stack Developer Intern

Pune (Remote)

Feb 2026 – Mar 2026

- Built a full-stack MERN portfolio website from the ground up, implementing a fully responsive layout tested across mobile and desktop breakpoints.
- Designed and implemented REST APIs with Node.js and Express, handling client requests with sub-200ms average response times.
- Integrated the Nodemailer API for automated email notifications, enabling reliable delivery of user inquiries with zero failed sends during testing.

Skills

Programming Languages: JavaScript (ES6+), C/C++, Python, HTML5, CSS3

Frontend Technologies: React.js, Tailwind CSS, Responsive Design

Backend & Databases: Node.js, Express.js, MongoDB, REST API Design

Tools & Platforms: Git, GitHub, Oracle Cloud, Postman, Vercel

Core Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming, Database Management

Specialized Domains: Generative AI (Google Gemini API), Threat Intelligence, Data Visualization

Projects

CreatorFlow – Content Operations Suite | MERN Stack, OpenAI/Gemini API

- Built an operational dashboard for digital creators with a Kanban-style scheduling board, using React state management to organize 50+ concurrent content pipelines.
- Built a rich text script editor with integrated Generative AI (Gemini/OpenAI) to auto-generate content hooks, cutting manual ideation time by an estimated 40%.
- Designed MongoDB schemas and added backend API rate limiting to keep the application stable under repeated requests.

TalentMatrix AI | React, Node.js, Gemini API

- Built an AI-powered application using the Google Gemini API to parse resume PDFs and extract structured data in under 3 seconds.
- Implemented logic to generate skill-gap analyses and personalized 3-month career roadmaps, achieving 95%+ accuracy on test resumes.

HoneyBot – Threat Intelligence Honeypot | Cloud, Cybersecurity

- Built a cloud-hosted decoy SSH server to intercept, log, and analyze automated attack attempts in a controlled environment.
- Built a real-time dashboard to visualize captured credentials and map attacker IP origins on a global map.

Music Player | React, CSS3

- Designed and built a web-based music player with a Neumorphic UI aesthetic for a clean, modern listening experience.
- Implemented interactive playlist controls using React state management for smooth, uninterrupted audio playback.

Education

JSPM Bhivrabai Sawant Institute of Technology and Research

Bachelor of Engineering (B.E.) in Information Technology

Pune

Aug 2022 – Present

- Core Coursework:** Object-Oriented Programming (OOP), Computer Network Security (CNS), Data Structures & Algorithms (DSA), Operating Systems (OS), Database Management Systems (DBMS), Software Engineering (SE), Web Technologies, IoT.

Achievement or Certifications

Oracle Cloud Infrastructure Generative AI Certified Foundations Associate – Oracle (2025)

Oracle Cloud Infrastructure Foundations Associate – Oracle

Data Visualization Virtual Experience – Forage (Accenture)

Cybersecurity Analyst Job Simulation – Forage (Mastercard)
